WHAT IS THE STATE ROUTE 4 CROSSTOWN FREEWAY PROJECT?
The project will extend the Crosstown Freeway west from Fresno Avenue to Navy Drive. The extension will be carried on twin viaduct (bridge) structures that will cross over Fresno Avenue creating a grade separation that will no longer allow highway traffic to enter the Boggs Tract neighborhood at Fresno Avenue. Navy Drive will be converted to a four-lane facility with auxiliary lanes and a partial interchange.

WHO IS RESPONSIBLE FOR THIS PROJECT?
The San Joaquin Council of Governments (SJCOG) is the lead agency for design, working in partnership with Caltrans, the lead agency for construction as well as the City of Stockton and San Joaquin County.

WHAT IS THE PURPOSE OF THIS CONSTRUCTION PROJECT?
The purpose of the project is to:
- Improve the connection between I-5/Crosstown Freeway, the Port of Stockton and adjacent industrial uses
- Reduce industrial truck traffic through the residential Boggs Tract neighborhood

WHAT IS THE PROJECT COST AND HOW IS THIS PROJECT BEING FUNDED?
The project is programmed and funded through a combination of the Proposition 1B Trade Corridor Improvement Fund (TCIF) and Measure K (San Joaquin County’s one-half cent sales tax).

Total project cost is $140 million:
- TCIF: $70 million
- Measure K: $70 million
**WHAT WILL BE THE HOURS OF OPERATIONS?**
Construction will generally take place Monday through Friday from 7:00 a.m. to 5:00 p.m. The contractor may also work at night on occasion.

**WHAT CAN I EXPECT DURING CONSTRUCTION AND HOW WILL THIS PROJECT IMPACT ME?**
All access to businesses and residences will remain open during construction. Local property owners and the traveling public may experience lane closures, traffic delays or in some cases detours for necessary construction improvements. You may also experience typical construction related noise during scheduled working hours.

Traffic detour information will be made available prior to closures to ensure the traveling and impacted public are aware and can adjust their travel plans accordingly.

A construction liaison will work closely with property owners throughout the project to inform them of upcoming activities and address any concerns.

**WHEN WILL THE WORK BE COMPLETED?**
Construction is slated for completion in fall 2017.

**HOW WILL THE PROJECT BE CONSTRUCTED?**
The construction project is planned to be completed in three stages to minimize impacts and maintain traffic movement for local and regional travelers. The project will:

- Construct SR-4 viaduct (bridge) extension from Fresno Avenue to BNSF Railway
- Construct SR-4 viaduct (bridge) over BNSF Railway. Construct fill, road and basins at ramp terminal
- Construct Navy Drive widening
- Remove Fresno Avenue ramps and finish grading
- Construct Tillie Lewis Drive pavement, install signal at Charter Way

**STAY INFORMED**
Timely construction information and updates will be posted to a special designated project website at www.measure-k.com. In addition, to address community questions and concerns, a project information hotline can be accessed at (209) 942-6062.

SJCOG will also distribute traffic alerts and project updates electronically for those who wish to receive e-blasts.

SJCOG and Caltrans understand the impacts this project may cause so we thank you for your patience and appreciate your support during this important infrastructure improvement project for our region.
